Toolbox

🍏 Languages: Swift, Objective-C

🎨 User Interface: xib/storyboard, in-code, SwiftUI, iOS-SDKs

🖼️ Frameworks: iOS-SDKs, WatchKit-SDK, ARKit

🏗️ Architectures: MVC, MVVM, VIPER, CleanSwift, Yarch

🗄️ Databases: CoreData, Realm, SQL

🌐 Other: REST API, JSON/XML, Multitasking/Multithreading, Animations

🔧 Tools: Xcode, Profiler, cocoapods, carthage, spm, Git, Jira, Confluence, circle-ci, fastlane

Personal Snapshot

🎂 Born on 14/11/1978 in Krasnoyarsk, Russia

🇩🇪 German Nationality & 🇷🇺 Russian Citizenship

👨‍👩‍👦 Happily married with three boys

🙋‍♂️ Male

Language Proficiency

🇬🇧 English: Upper-Intermediate (B2-C1)

🇷🇺 Russian: Native

🇩🇪 German: Elementary

🇦🇲 Armenian: Elementary

Practical experience

Yandex Practicum (educational cources)

📅 since 01.2023

👨‍💻 Tutor of iOS Development Courses (Remote Position)
Responsibilities: Student support, conducting webinars, code review
Technologies used: Swift, UIKit, CoreData, MVVM-architecture

Tinkoff (product company)

📅 01.2023 - 04.2023

👨‍💻 Senior iOS Developer (Remote Position)
Responsibilities: development application, maintenance, refactoring, bug-fix, PR reviews
Technologies used: Swift, UIKit, REST API, CoreData, MVP-architecture

Preezma (outsource/outstaff company)

📅 04.2022 - 01.2023

👨‍💻 Senior iOS Developer (Office Position)

Responsibilities: development application, maintenance, refactoring, bug-fix, PR reviews
Technologies used: Swift, UIKit, REST API, Realm, voice recognition, MVP-architecture

Alfabank (product company)

📅 11.2020 - 04.2022

👨‍💻 Senior iOS Developer (Remote Position)

Responsibilities: development application, maintenance, refactoring, bug-fix, PR reviews
Technologies used: Swift, UIKit, YARCH-architecture

8bit (product company)

📅 11.2019 - 11.2020

👨‍💻 iOS Developer (Remote Position)

Responsibilities: development application, maintenance, refactoring, bug-fix, architecture design, PR reviews.
Technologies used: Swift, UIKit, REST API, MVC

Mirror-AI located in California (sturtup, ML/AR)

📅 06.2018 - 11.2019

👨‍💻 iOS Developer (Remote Position)

Responsibilities: development application, maintenance, refactoring, bug-fix, PR reviews.
Technologies used: Swift, REST API, Core Data, AR

Ronte LTD located in Berlin (product company)

📅 10.2017 - 06.2018

👨‍💻 iOS Developer (Remote Position)

Responsibilities: development application, maintenance, refactoring, bug-fix, assessment of labor
Technologies used: Swift, REST API, Realm

RedMadRobot (outsource company)

📅 07.2016 - 10.2017

👨‍💻 iOS Developer (Remote Position)

Responsibilities: development applications from scratch, maintenance, refactoring, bug-fix.
Technologies used: Swift, REST API, RxSwift

Globus LTD (outsource company)

📅 03.2016 - 06.2017

👨‍💻 iOS Developer (Remote Position)

Responsibilities: development applications from scratch, maintenance, refactoring, bug-fix, architecture design, PR reviews. Interviewing and screening candidates. Evaluation of tests on the developer's position, supervising interns.
Technologies used: Objective-C, Swift, REST API, Realm, CoreAnimation

UnrealMojo (outsource company)

📅 09.2014 - 03.2016

👨‍💻 middle iOS Developer (Remote Position)

Responsibilities: development applications from scratch, maintenance, refactoring, bug-fix, assessment of labor.
Technologies used: Objective-C, REST API, CoreData, WatchKit

Zennex (outsource company)

📅 02.2013 - 08.2014

👨‍💻 junior iOS Developer (Remote Position)

Responsibilities: development applications from scratch, maintenance, refactoring, bug-fix, assessment of labor.
Technologies used: Objective-C, REST API, Core Data, SQL

The most intresting projects

CocoonWeaver

[app store](#)

📅 04.2022 - 12.2022

📱 An application for cataloging audio recordings

➡️ iPhone, Apple Watch

AlfaBank Alfa Mobile Personal Account

[app store](#)

📅 11.2020 - 03.2022

📱 The application for the users of the biggest private bank in Russia.

➡️ iPhone, iPad

Mirror: Avatar & Sticker Maker

[app store](#)

📅 06.2018 - 11.2019

📱 The app allows users to generate thousands of personalized stickers based on selfies taken.

➡️ iPhone

Yandex.Weather

📅 06.2017 - 08.2017

📱 The weather service for the biggest internet company in Russia

➡️ iPhone, iPad

SberBank FinAdvisor

📅 08.2017 - 10.2017

📱 The financial adviser service for the biggest bank in Russia

➡️ iPhone

Tele 2 TV

📅 03.2016 - 06.2016

📱 The streaming service named "Tele 2 TV" for one of the biggest cellular operators in Russia

➡️📱 iPhone iPhone, iPad

[Megafone Personal Account Application](#)

📅 09.2014 - 03.2016

Worked as the only iOS engineer

📱 The application for the users of the leading mobile operator in Russia.

➡️📱 iPhone, iPad, watch

Education

Krasnoyarsk State Pedagogical University named V.P.Astafiev

📅 09.2000 - 07.2003

👩‍🏫 Associated Professor of Computer Science

🎓 Candidate to Doctorate of Pedagogical Sciences

🏫 University Classes

Krasnoyarsk State Pedagogical University named V.P.Astafiev

📅 09.1995 - 07.2000

👩‍🏫 Teacher of Computer Science and Economics

🎓 Specialist

🏫 University Classes

Krasnoyarsk State School #84

📅 09.1985 - 06.1995

🎒 School Student

Side Jobs and other practical experience

Krasnoyarsk state pedagogical university named V.P.Astafiev (and Other Institutions)

📅 09.2000 - 08.2010

💻 Conducted a Computer Science class

🔤 Conducted a Computer Languages class

Professional Journey

🚀 Key Responsibilities

Throughout my career, my roles across various companies have revolved around new feature implementation, codebase maintenance, refactoring, and bug-fixing. I've had the opportunity to collaborate with backend, design, and tester teams to build more efficient APIs and architectures. For instance, I've had in-depth discussions on human interface guidelines with designers.

🎯 Additional Responsibilities

In addition to my core duties, I've also been involved in the hiring process, screening and interviewing candidates, and evaluating their test tasks. On a few occasions, I've supervised interns, leveraging my teaching experience to guide them effectively.

🎓 Teaching Experience

It's worth mentioning that I've spent over 15 years as a professor of computer science at a university, conducting classes on programming

languages and more. This experience has enriched my understanding of the field and honed my problem-solving skills.

🏆 Achievements

I'm proud to say that the apps I've worked on are used by millions of people. Some notable examples include the "Megafon Personal Account" for one of Russia's leading mobile operators and the streaming service "Tele 2 TV". In total, I've contributed to more than 30 projects, large and small.

🍏 Why I'm a Great Fit for an iOS Engineer Role

I bring over 11 years of experience as an iOS developer. I'm proficient in both languages in the Apple ecosystem. I've been working since the era of iOS 5. I've written applications for all Apple mobile devices - iPhone, iPad, and Apple Watch. For me, working within the Apple ecosystem is not just a job, it's a passion. I'm an avid user of Apple products in my everyday life.

💪 My Strengths

I'm a responsible and disciplined individual. I believe in seeing tasks through to completion. I'm committed to achieving the best results, even if it means working after hours.

Off the Clock

When I'm not coding, you can find me traveling, learning new languages, diving into a good book, or enjoying a movie.
